PROJECT SUPPORT ENGINEER

Company profile

Stokota NV is a fully Belgian owned company, manufacturer of road tankers, established in 1963. Headquarters in Lokeren, Belgium.

Within the Stokota Group we have 3 divisions :

- **FUELS AND ENERGY:** Road tankers for fuel transportation (gasoline, gasoil, domestic fuel, bitumen and LPG).
- **WASTE AND CLEANING:** Vacuum operated road tankers in stainless steel, designed for the removal of dangerous industrial waste, sewer cleaning, ...
- **AVIATION FUELLING VEHICLES:** Aircraft refuellers (civil and military) and other ground support equipment. Equipped with pump- and measuring installation, scissor lifts and other specific equipment.

Stokota Group has 4 locations :

- Stokota NV – Lokeren, Belgium. Headquarters with financial department, engineering and service.
- Stokota Sp.Z.o.o Elblag – Manufacturing plant (incl. tank production).
- Stokota Sp.Z.o.o Kielce – Manufacturing plant.
- Stokota Cime France – Assembly and service plant for France.

We currently have an open vacancy for a Project Support Engineer in our facility in Lokeren (BE).

Function description

Responsible for projects within our different divisions.

The vacancy is split in two parts.

- Part 1 :**
- After-Sales Engineer
 - Part of the After-Sales Engineering Team (Primarily W&C and AFV)
 - Report to respective BU Managers
 - Service, repair, overhaul, modification and spare parts sales
 - Knowledge of construction (steel, aluminium, stainless steel), piping, pneumatics, electrics and hydraulics). PLC programming is an asset.
 - You are capable of transforming a service request into a planned and prepared intervention. You will organize the intervention and decide who will do the intervention (you or a service technician).
 - Being part of the after-sales service team will give you good insight in the construction, the operation and the handling of the different types of vehicles Stokota produces.
 - You are closely involved in the testing, start-up and delivery of after-sales service projects.
- Part 2 :**
- Involvement in the homologation and registration of new vehicles.
 - Checking new deliveries from the production plant on dimensions, equipment, weights, ...
 - Online pre-registration, issue Certificate of Conformity, customs, ... of new vehicles.
 - You will be trained by the current homologation manager.

Furthermore you are strong in communication and result-oriented thinking. You will communicate with colleagues, suppliers and customers (both in Belgium, Poland or other countries). You can respond quick and adequate to questions and issues coming from customers as well from production (feedback to the design team engineering).
